Claims 1-3 remain in this application.

Claims 1-3 stand rejected under 35 U.S.C. §103(a) as being unpatentable over Rogers et al in

view of Johnson, Jr., It is respectfully submitted that claims 1-3 patentably distinguish over the

rejection of record. Rogers makes no mention of an address, much less an encrypted address in

any of the sections cited in the Office Action or anywhere else that the undersigned could see

either visually or by computer search of the document.

While Johnson, Jr. may have unique addresses, the disclosure therein typifies prior art devices

where each remote device or unit has a hard-coded identifier which is applied during

manufacture. The norm for network devices such as Ethernet and WiFi cards is for each such

device to have an address (a MAC address) assigned to the device at the factory. Johnson Jr. has

a tag identifier on the eard and there is no indication that Johnson Jr.'s POS device assigns that

identifier. Applicants' claimed invention however assigns and communicates a unique identifier

into each remote device. The Examiner is requested to set forth where these specific limitations

can be found in the references of record.

There is no suggestion or motivation as to how or why one would apply Johnson Jr. to Rogers

and even if one did, one would merely have a prior art device with hard-coded addresses, that

specific disclosure apparently being absent from the references of record.

Claim 1 calls for the central device to be registering a remote location device on the central

control device and "assigning and transmitting an encrypted address unique to each said remote

Amdt.dated March 30, 2007

Reply to Office action of December 1, 2006

location device from said central control authorization point and storing said unique address on said remote location device." These limitations are nowhere shown nor suggested in the references of record.

Applicant respectfully requests that a timely Notice of Allowance be issued in this case.

Respectfully submitted,

Douglas B. Farrow
